Div for The Header: Will have the company's name in a larger and bolder font than the rest. I will make the style of it in Georgia font. There will be a large image banner behind the company name. Said image is also known as a hero-image. "Refine yourself" is placed below "Anderties" and then underneath "refine yourself" will be a button that says "shop now." This button when clicked, will take the user directly to the different types of ties from which they can choose.

{ font-weight: bold;}

Div for the middle: There will be different tabs underneath the header that will be placed in a row. These tabs will be labeled with the secondary pages that I have chosen. According to which ever tab the user selects, they will then be directed to that page.

{ text-decoration: none; font-size: 16px; font-family: Arial, Verdana, Helvetica, 'san serif'; color: #858594; font-weight:bold; }

Div for the table: There will be a table without borders for where the ties are laid out. The ties will take up the whole page.

Div for the left column: There will be the same tabs that were listed on the home page except they will be positioned as a list on the left side of the page in order for the users to quickly jump to their desired locations.

The background color will be consistently white throughout the whole website. This will allow the black font and bright colors of the ties to better stand out.

Times New Roman Serif is what I will be using for the font.
